
The **On**-Trend, Mobile Trailer Abattoir

The idea of mobility extending beyond just a mobile device is a concept that spans almost every industry both locally and globally. JF Equipment, leading innovators and manufacturers of food processing solutions pioneers the idea of mobile food processing with the launch of their mobile abattoir.

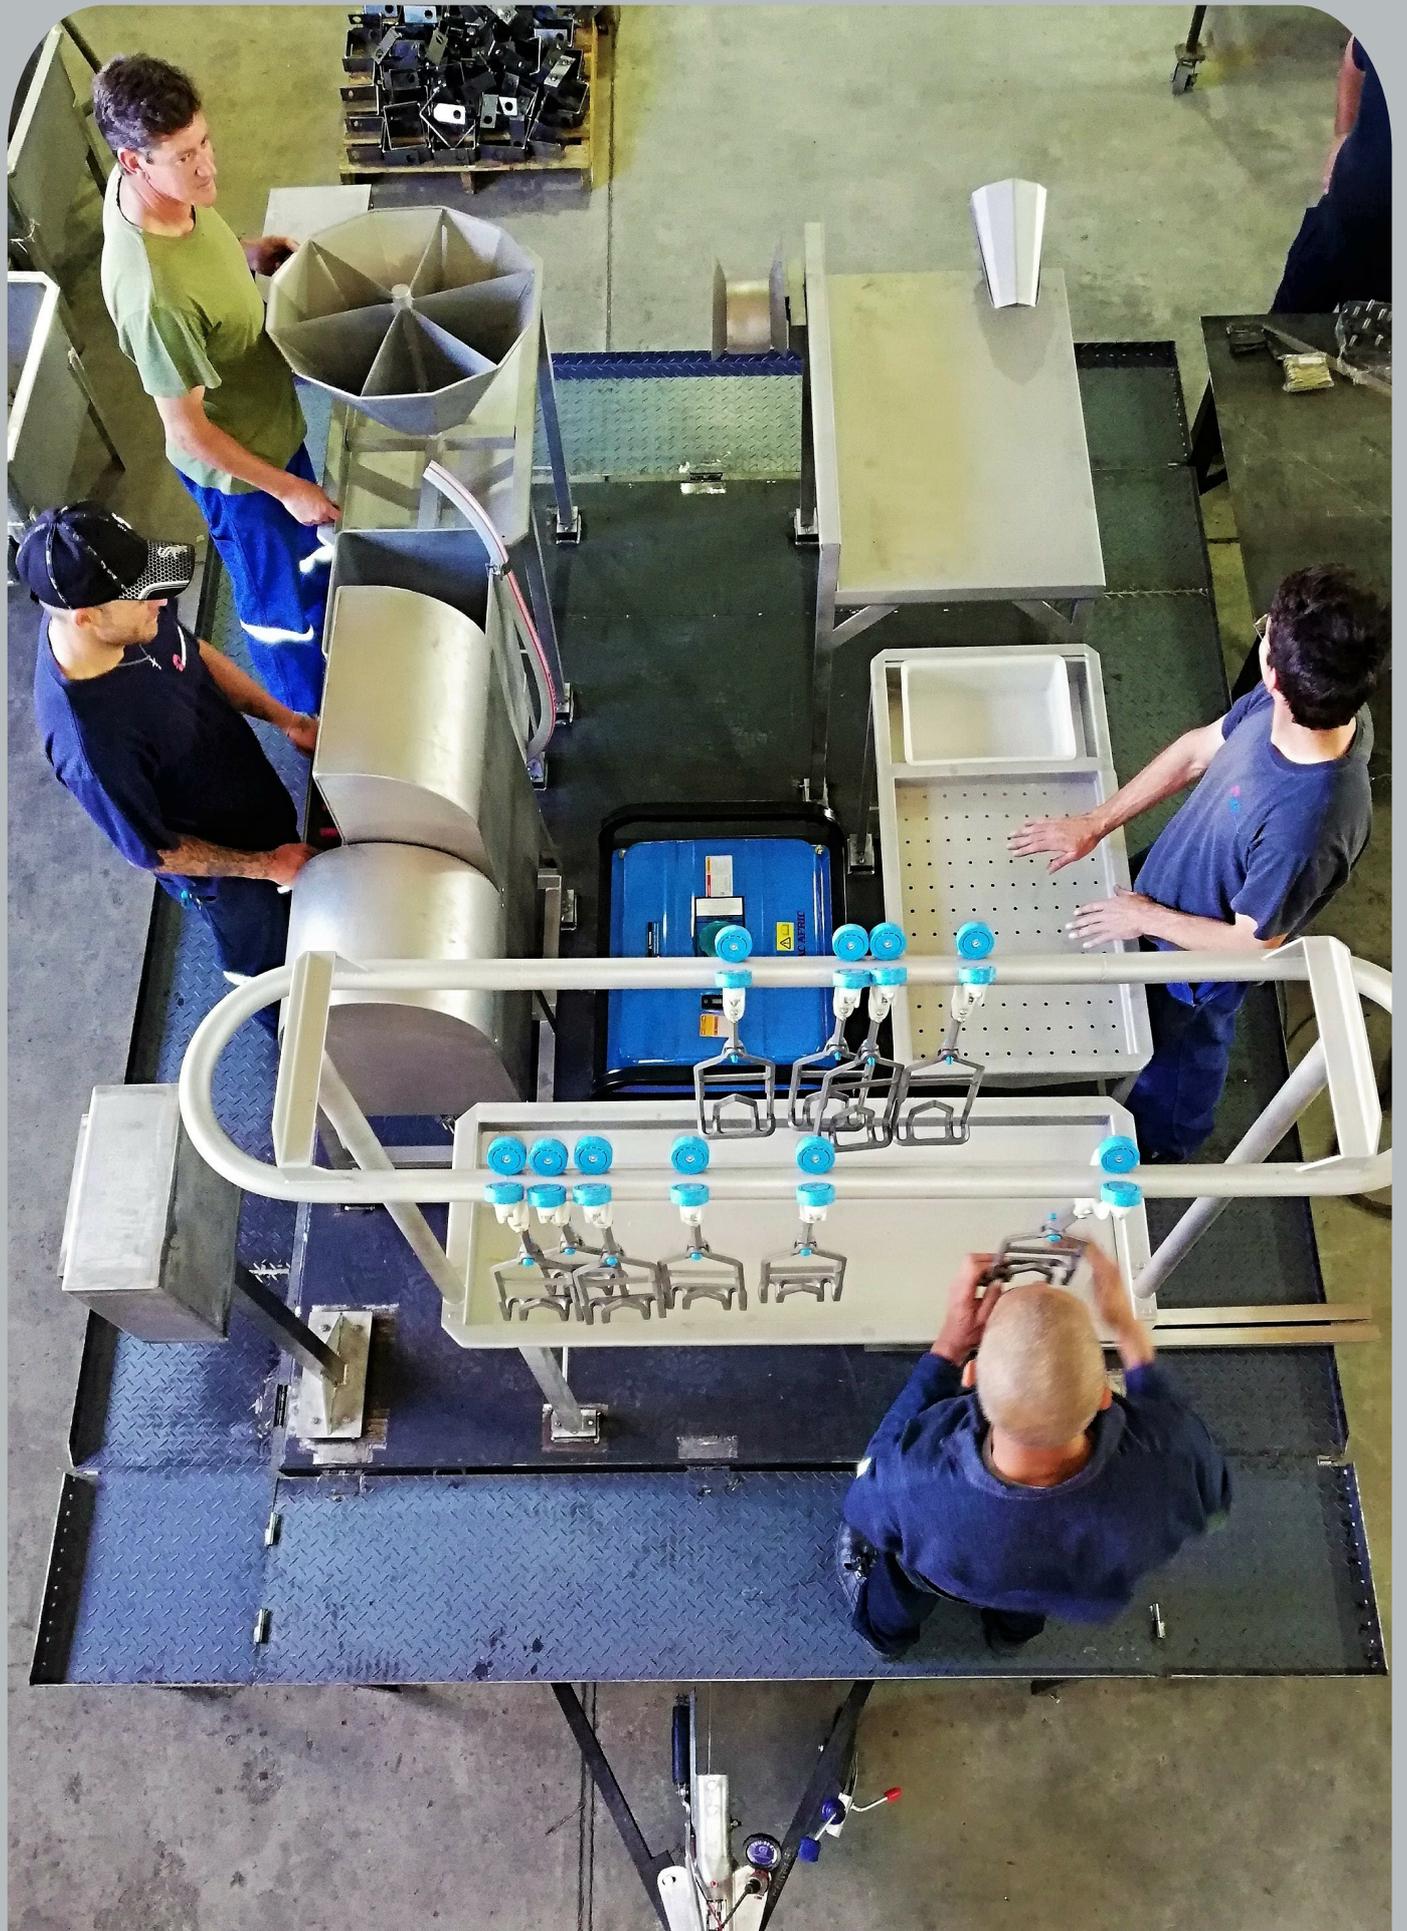

This durable and easy to clean mobile abattoir takes only 30 minutes to set up and delivers between 500 – 1000 birds per day.

The trailer abattoir is portable and light-weight which is easy to hitch up to a bakkie or truck for easy transport in and out of rural, outer-lying areas and comes with an on-board generator for easy access to a power supply.

The unit also follows the legislative requirements for ethical and fair practise of poultry processing, can be effectively operated by only 4 people, is hygienic and sterile without the expense of 'EIA'.
(Environmental Impact Analysis)

Additional 'add-ons' products are also available for the trailer abattoir:

- Packaging
- Portion systems
- Refrigeration
