

JF Equipment's ground-breaking, quality-engineered
Foot/Bird Unloader

JF Equipment is showcasing their newly designed Foot Unloader in this September Issue.

Due to the robustness of this innovative design, the foot unloader promises to bring greater long-term cost benefits. This foot unloader is able to process any type of shackle allowing fewer complications on the lines, with a decrease of up to 99% of product forgotten on processing/overhead lines.

When compared to any other foot unloader on the market, JF Equipment's foot unloader operates using fewer moving mechanical parts, material bends and other components hence, resulting in less maintenance and part replacement. With less maintenance and downtime users can be assured of a profitable and sustainable solution for the future.
